EXPERIENCE

Front-End Developer   April 2021 – Present
Codewave Technologies Pvt. Ltd.   *Bangalore, KA*
- Worked on multiple projects from various domains such as Trading, Ed-Tech, Consulting, etc.
- Translated user requirements into scalable code, analysed user feedback and prioritized web page responsiveness.
- Built complex and functional user interfaces using Javascript frameworks like React, Next, Gatsby.
- Integrated user interfaces with REST apis or GraphQL queries generated from the backend.
- Worked on headless CMS (Content Management Systems) like Wordpress and Strapi to deliver content to the frontend via REST apis or GraphQL queries.

PROJECTS

Fyers | *React, Redux*   April 2023 – Present
- Currently working on the Fyers - My Account module
- Working on new features like value curve which provides graphical view of the person's holdings and current value
- Concurrently working on fixing real-time bugs reported by the customer service team.

Appsteer | *Next, React, Strapi*   Feb 2023 – April 2023
- Built user interfaces for four pages of the website using Next and React
- Added data for the same using Strapi on the CMS front
- Integrated the REST apis generated from the Strapi admin dashboard

Emint | *React, Redux, Sass*   Apr 2022 – Jan 2023
- Emint is a trading platform similar to Zerodha and Upstox. I was responsible for building and integrating the entire onboarding flow of the application on the web.
- Built complex and functional UI using React and Sass.
- Setup the Redux store and managed state globally.
- Integrated REST apis and also third party vendors like Digio who provided different services in the onboarding journey.
- Integrated the payment gateway using Cashfree Payment Gateway.
- Referred plenty of documentation prior to the integration of third party services.

Tautmore | *React, Redux, Styled Components*   Feb 2022 – Apr 2022
- Built UI for a few screens using React and Styled Components
- Integrated Zoom SDK to host and join online meetings.
- Integrated REST APIs using Axios and also was involved in fixing bugs.

Worldgrad | *React, Gatsby, GraphQL, Sass, Wordpress*   May 2021 – Jan 2022
- Built UI for various screens using React and Sass
- Maintained and organised content on Wordpress and generated queries using GraphQL.
- Fixed bugs and accommodated changes proposed by client.
